MY GARDEN

THOSE who love Nature
can never be dull!

They may have temptations, but they will run no risk of being beguiled by ennui, idleness or a want of an occupation.

The love of Nature keeps us free from those mean and petty cares which interfere so much with calm and peace of mind. It turns every daily task into a blessing, and brightens life until it becomes almost like a living dream.

My Garden, with its silences, and beauty, and the pulses of fragrance that come and go on the airy undulations, affect me like sweet music.

Care always stops outside the gates and gazes at me wistfully and jealously through the bars.

Among my flowers Nature takes me into her own hands, and I breathe freely and joyously—as did the first man.

OUR 1926 STATE FAIR AWARDS

The Result of Quality!

Our Policy of SERVICE

Our SERVICE POLICY in merchandizing does not mean just courteous salesmanship, prompt delivery, good measure, and the like.

It consists of a great deal more than those—service in ascertaining and fulfilling the needs and desires of the public in a satisfactory and economical manner, the searching out of the best markets of the world from which may be procured the products best suited to meet our customers' requirements; merchandize which must meet and conform to the very highest standards, and which must also represent the maximum of value that is possible for us to offer at any fair price.

In fine, such service, whatever be its nature, that you would expect to come from

"THE HOME OF THE WORLD'S FINEST GLADS!"

An old Persian proverb says, "The Priceless Ingredient of any product in the world is the Honor, and the Integrity of him who makes it!"

The safe delivery of our merchandize to a customer is never the conclusion of a transaction with us. We are interested in that customer for all time, for in the merchandize he receives is built all the Honor and the Integrity it is possible to include in any product or transaction!

By a close intimacy with the fundamentals of business ethics, by an intimate supervision of the many details involved in growing and marketing "THE WORLD'S FINEST GLADS," and by a never-ending effort and interest in making our bulbs satisfactory to our customers, we are ever striving to better serve those who purchase from us.

For us, the growing of *Gladiolus* is not alone a business. In it we find a rare pleasure which compensates for many of the disappointments and hardships which come in any commercial enterprise. It is doubtful if ever there was a human being with high instincts, who ever was tired by the endless variety, and the glorious colorings of the *gladiolus*.

We would not find this pleasure in business were we to give each buyer just his money's worth of what his order called for, and then call the transaction finished!

Our pleasure is largely found in your pleasure—in the enjoyment you find in your flowers which have come to you from us, and in the delivery of that intangible something called "Good Will" or "Service," and which is always included in the delivery of our orders, "No Charge."

We will continue in our efforts to Serve, for a life-time of willing Service has made us incomparable Friendships of inculcable value.

We trust that you will not hesitate to submit your *Gladiolus* Garden needs and problems to us, for we assure you it will be a pleasure to help.

We want to thank you for the business which you have intrusted to us in the past, and to hope that our SERVICE POLICY, into which has been built a life-time of Honor and Integrity, will merit your confidence for future business.

A. J. ANDERSON,
White Bear Lake, Minn.

"BE GLAD WITH GLADS!"

Visitors Are Always Welcome

The growing of Gladiolus in a commercial way may be "old stuff;" it might even become routine and so without interest to many growers, but to us, it never gets old. For us, the growing of flowers has never lost its romance and charm, and there is poetry in every bloom, interest in every operation from the preparing of our rich, productive soil to the final disposal of every bloom and bulb.

We sincerely urge that you **come and see us**, for there is always something of interest to be seen and learned at our Gardens, and we do not hesitate to give you information, to show you if we can, the many alluring things that you may have overlooked in your Flower Garden.

For example, while we do but little of it, yet the "crossing" or "breeding" of the Gladiolus for new types and varieties is not an operation shrouded in mystery, it is not a magical process known to but a few; it is a simple little operation based on the natural laws of plant life and heredity, and can be performed by the veriest novice once he has been instructed in the mechanical actions and conditions, and may be done in any Gladiolus Garden.

We are glad to be of help to you at any time, for it is by these acts of Service and Courtesy that we expect you to become our Friends and Customers.

Our gardens are located 12 miles north of St. Paul, on paved road. Take Highway No. 1 to White Bear Lake. After passing the north-west end of the lake, instead of continuing on No. 1 through the city, you turn to the left, crossing the N. P. R. R. tracks, at the Standard Oil filling station onto Bald Eagle avenue. Continue north 1 mile. Our place is on the west side of the avenue, just before you come to the Soo Line R. R. crossing.

Coming from Minneapolis it will be less confusing to take Highway No. 63. Continue on this road until you reach the city of White Bear Lake. Turn north onto Bald Eagle avenue at the first stop and go sign and continue north about three-quarters of a mile to our place.

Blooming time with us is usually from July 15 until frost. But more of the finest varieties will be at their best about August 1 to 15, according to season.

We will make you welcome, for we want you to know

The Home of the World's Finest Glads.

"BE GLAD WITH GLADS!"

The "QUALITY" of Our Bulbs

In the purchase of Gladiolus bulbs, the buyer must depend much upon the ability and knowledge, as well as the integrity of the grower, for many of the values of the bulbs are hidden from sight.

Perhaps first of all comes the selecting by the grower of the varieties he will produce and offer for sale. Ideas and tastes in the love of Gladiolus are various, and change, and it is with this thought that we are always seeking the newer and better varieties to fill the needs of our discriminating customers who will have "nothing but the best."

Every phase of the industry, including the choosing and preparation of the fields for planting, the cultivation and growing, the digging and curing, the handling, storing and shipping of the bulbs, all have a most important bearing on high quality.

Each of these operations receive our personal and intimate supervision to the end that no detail is overlooked which will make it possible to add more quality.

On page 1 of this book is an illustration of some of the prizes which have been awarded to us because of this "quality" in our bulbs, and we take a great pride in stating that not a bulb was planted or grown with the idea of exhibiting the bloom from it.

Many growers who exhibit their blooms, choose the bulbs with great care, count the days to the blooming time, check against the number of days to the date of the exhibit, and then plant with nothing but the exhibit in mind. They give those bulbs extra care and attention in fertilizing and watering, cultivating, and in other ways, many even protecting them from the wind and sun as they begin to bloom, and then show them as a standard growth from stock bulbs!

That is not our method for, with us, and our quality bulbs, it is not necessary. Our bulbs are all of **high quality to begin with!** Nor is any bulb petted or pampered in any way different from all the rest! All are treated exactly alike, **but**, all are grown and cared for with the knowledge, and by methods that time, study and experience have taught us will produce bulbs and blooms of unexcelled quality!

This knowledge and the care which all receive, together with the rich soil and ideal climatic conditions for bulb growing found in Minnesota, enable us to grow into our bulbs such elements and powers for germination and reproduction that we do not need use any artificial methods for growing "Prize Winning Blooms" from our **QUALITY** bulbs!

Our winnings at exhibitions have, in every case, been made with what we like to call our ordinary or standard blooms, blooms cut from our open fields, **but grown from the only kind of bulbs we have—QUALITY BULBS!**

Therefore we take an extra pride in saying that at the Gladiolus Exhibit of the Minnesota State Fair held last summer, we broke all previous records of winnings by far, with our ordinary standard field grown blooms and won against the keenest kind of competition.

With 24 entries there, we were awarded 20 **FIRSTS**, 2 **SECONDS** and 2 **THIRD PRIZE AWARDS!**

Also we won the "SWEEPSTAKES" or **GRAND PRIZE AWARD** which was given us on our showing of "Golden Dream."

These "prize winning bulbs from prize winning strains" are what you will receive when we fill your orders for that kind is all we have, and the only kind we will grow.

Then buy our "Prize Winning Strains" and grow only "Prize Winning Glads" for they will come to you from

"THE HOME OF THE WORLD'S FINEST!"

PART VIEW OF OUR FIELD AT BLOOMING TIME

Cultural Directions

It is a habit with us commercial growers to think and talk of growing in such terms as acres of land, trays of thousands of bulbs, tons of fertilizer, and many other things which are of daily usage to us in our growing on a large scale. From habit, we also use technical or abbreviated terms in our conversation or writing, which are all understood by other large growers but which are, perhaps, confusing and not understood by the small home gardener.

Our viewpoint is much different than yours. While we actually do work in acres of ground and with thousands of bulbs, yet your home garden is likely to be spoken of in such terms as square feet in the beds and perhaps a dozen or so of a few varieties of bulbs.

Many of our beginner and amateur grower friends tell us that because of this tendency on our part, it is hard at times to use the average cultural directions and get successful results with them, so this year we are not going to publish in our catalogue the usual directions for the growing of good *Gladiolus*.

Instead of doing that, we are going to send with each order, a printed set of *Gladiolus Cultural Directions* which covers the growing of this flower in every phase, from the time the bulbs arrive to you, through every operation of its growing and care and into storage next fall!

These directions have been compiled by The American *Gladiolus* Society, particularly for the benefit of the beginner and amateur, and are written in language that any one can understand and follow, whether he has ever grown flowers before or not.

Having been brought to their attention, the American *Gladiolus* Society deemed it of such importance as to warrant the creating of a full committee to consider and adopt as a standard, such cultural directions for beginners and amateurs as would enable them to grow good *Gladiolus* in the best and easiest way. The instructions for growing which you will receive with your order of bulbs are the ones adopted by that Committee of the Mother Society, and are printed on a sheet of a size which is convenient for having in the gardening basket or for tacking up in a handy place where it may be referred to at any time.

While the advanced grower may have his own methods for producing good *Gladiolus*, yet we believe that the beginner or amateur will greatly profit by following closely the directions contained in the set you will receive with your order.

You also benefit by being able to get exactly the kinds you want before our stocks of many kinds are depleted or possibly entirely exhausted.

Members of the American Gladiolus Society benefit further by way of discounts, and we believe every one who grows Gladiolus should be a member of that Society, if not already one. We are here offering an easy way for you to join, and hope you will take advantage of this opportunity. for its benefits are great.

Read of it on the inside, back cover page.

Sizes of Bulbs

All bulbs shipped will be of the best size and age for finest blooms and the reproduction of new bulbs.

Different varieties and types vary in the size of the bulbs. Some varieties grow but a little over an inch for large sized bulbs while others grow much larger. Most of our varieties run in size from 1¼ inches to 1½ inches. Extremely large bulbs are usually older ones which have passed the age for producing fine blooms, and therefore not so desirable as strong, plump, young bulbs.

Except in the more rare varieties where they are listed and will be ordered as "Large," "Medium," or "Small," all orders will be filled with our standard large bulbs of best blooming age.

Read Carefully Before Ordering

Send all orders early to enjoy the discounts and to insure your getting all of the varieties you want. All orders filled in rotation as received and as stocks are of unequal quantities, many of them are soon exhausted.

Please use the enclosed order blank for it helps us to accurately fill and expedite your order.

Remittances must accompany all orders. Cash in full to enjoy the discounts on early orders, or a deposit of 25% of the amount of the order will hold it until March 15, 1927, when remittance in full must be had or we will ship C. O. D. for the remainder.

Domestic remittances will be accepted by bank draft, personal check, postal or express money order.

Claims for any shortages must be made immediately upon receipt of the bulbs.

Foreign shipments, except to Canada, cannot be guaranteed for safe arrival due to delay and transit conditions entirely beyond our control. We take especial care to send only well cured bulbs, packed and guaranteed frost-proof, and shipped in proper season for foreign planting conditions. Foreign remittances accepted in International Drafts or Money Orders on Chicago or New York Banks only in full value of American Money Exchange.

Canadian buyers will please be sure to give the number of their import permit.

Foreign orders are shipped with certificate of inspection from our State Entomologist as required.

All retail orders in an amount of \$2.00 or over will be shipped PREPAID to any part of the World reached by Parcel Post.

All retail orders over the sum of \$5.00 will be shipped PREPAID AND INSURED to any part of the World reached by Parcel Post.

My references. Any Commercial Rating Agency or, by special permission, refer to The First National Bank, White Bear Lake, Minn.

Shipping dates. We begin to ship orders about March 1, for domestic or North Temperate Zones. Orders for Australia, New Zealand, Philippine Islands, Japan, etc., will be packed guaranteed frost-proof, and shipped earlier in the year.

Wholesale lists for Commercial Growers. We have many varieties in sufficient quantities to sell in lots of thousands or more. We have issued a Wholesale List that is yours for the requesting of it on your business letter-head. Our 1926-27 Wholesale List contains the names and prices of 85 of the newer and better varieties which are popular sellers and good payers for commercial purposes, and also the names and prices of 35 varieties which are yet classed as "rare." Prices for greater quantities and of varieties not listed are just a matter of correspondence and we likely have what you want.

All prices are so low that they will be more than interesting to you and the quality of the stocks is of the highest.

Write NOW for one of our Wholesale Lists!

Healthy Bulbs. Our bulbs are all grown in rich Minnesota soil, under conditions which fill them full of potential "growing dynamite." An evenly balanced chemical content in the soil, coupled with the cool, moist air of the Minnesota Lakes District, makes an ideal condition for producing bulbs which will do well in any country without being acclimated as is so often necessary with bulbs from other soils, climates and latitudes. Our bulbs are unexcelled in strength and hardiness and will grow well for any one, anywhere!

"BE GLAD WITH GLADS!"

The World's Finest for 1927

In the list which follows you will find only those varieties which may well be called "The World's Finest Glads!" None are old—every one is good.

We offer here many different varieties and types, many different kinds and prices coming from all parts of the world, so that every taste and changing desire of the Gladiolus lover, from that of the beginner to that of the discriminating connoisseur may be satisfied.

Perhaps you will note the absence of any classed as "Anderson Originations"—and wonder why?

It is our conviction that many growers "hybridize" or "breed," then offer for sale many kinds which are usually very much over-rated and over-stated in almost every way.

That, we do not do!

We search the market places of the world for the best to be had from only the outstanding and foremost hybridizers wherever they may be found!

Thus we are assured that our collection is second to none, for the judgment of all those originators is at stake and their products must always be tried and proven before dissemination!

Were we to offer our own originations, it would be just our judgment of quality and merit against the judgment of the buyers of the world, one man's judgment against that of the millions.

We are glad to acknowledge the superiority of the multitude which have joined in the approval of the kinds we offer here, for there was never a truer maxim in business than "Fear not to buy that which the generality of men join in approving!"

New and better originations are offered each season. We make an effort to see as many of them as we can, and choose only those which show outstanding merit and value for our growing and offering to our friends. As quickly as stocks can be grown large enough for disseminating, we offer these rare treats to you and we have no hesitancy in assuring you that there is nothing but pleasure and enjoyment to be found in any of the varieties you may select from us.

As they grow and bloom in your garden you will agree with our assertions that this is in truth,

"The Home of The WORLD'S FINEST GLADS!"

Convinced of "Anderson Quality!"

In our introduction in the fore part of this book, we said that we found rare pleasure in our work of growing *Gladiolus* for sale. One of the most enjoyable features in our entire business is the receiving of the many, many letters coming to us which tell of the joy and satisfaction our bulbs have given.

As we read these expressions of good will, we feel that they are a full compensation for the efforts we are always making to give our friends the satisfaction they are entitled to have.

We would like to publish every one of them so that you could enjoy them with us, but a lack of space forbids. We do, however, offer these as convincing proof that we are not over-stating our claims for Quality Bulbs, and that our care and methods of merchandizing are appreciated and therefore are worth while:

Renwicktown, New Zealand,
Nov. 26, 1926.

Dear Sir:

The bulbs were delivered to me today. Exactly one month from the day of posting. They are in good order. Just as good as if they were grown in my own garden, which is the highest praise I can give to any bulbs. They are certainly better than bulbs bought this season in New Zealand.

If the quality is good, what shall I say about the quantity? You have sent double the value and also there is a bulb of _____. I would have considered myself fortunate to have received a bulblet. I am delighted. It will be grown with interest, and I will let you know the results.

With many thanks,

Yours faithfully,
G. A. C.

Wisconsin, May 20, 1926.

Dear Mr. Anderson:

I received my order of bulbs from you in fine shape, and it would be hard for me to express in words how well pleased I was with it. This year I ordered bulbs from ten different growers. None of the orders as large as the ones I sent you, but in only one case did the bulbs come up to yours.

I also want to thank you for the splendid varieties you sent me "gratis" and for the extra count on my orders. I certainly will continue to do business with you in the future.

Wishing you the best of success,

Yours very truly,

Dear Sir:

Thank you for the prompt and efficient manner in which you handled our recent orders. We did need them and appreciate greatly the way you have treated us. That is what real service is.

A friend of mine in Connecticut told me that one could expect service from you, and I guess he knew. By the way, Mr. C. is a real man himself.

P. S. Stock satisfactory, too. Some difference between it and some other stuff I received a few days ago from a _____ grower.

The bulbs arrived in great condition on May 12th. I say I must thank you again for those bulbs, all top notchers. What made you send me such stunning present gratis?

I must compliment you on the high class varieties contained in your list.

Dear Sir:

Your shipment of bulbs arrived in fine condition, and I want to thank you very greatly for the bulbs you so generously gave me. I read in the F. G. the story of your misfortune last fall, due to the bad weather, and was indeed very sorry to learn how great was your loss, and when I sent you my small order I had not the least thought that so generous or any gift of bulbs would be included. This has given me a very fine and deep impression of you, and I will not fail to tell of and about you. I am just a beginner, growing for pleasure. Don't have much time but enjoy seeing the blooms, and giving them away. Hope to give you a real order some day, and that you experience as much good fortune in the future as you have been generous in the past.

Yours sincerely,

Dear Friend:

I received the bulbs today, and very much pleased with them. I certainly do thank you for the "gratis" bulbs; they are all very fine. I wish I lived nearer your farm, as I would love to go through a large gladiolus field and select the new bulbs I get every year. If I am living next fall you will hear from me again. I always get 25 bulbs of a kind and maybe you can help me select some new ones. I want about the same number I bought this year. Thanks very much for the fine bulbs.

I beg to remain,

Your friend,

"BE GLAD WITH GLADS!"

The AMERICAN GLADIOLUS SOCIETY

THIS Society was formed a number of years ago, for the purpose of spreading information and knowledge regarding the Gladiolus. It has grown until today it is one of the largest exclusive Floraculture Societies in the country.

Each month it publishes a magazine called the Official Bulletin, which contains Gladiolus news and information gathered from all parts of the world and treating every phase of Gladiolus breeding and growing.

Its contents are contributed by informed and authoritative writers who use very plain and understandable language, written primarily for the benefit of the beginners and amateur growers of the Gladiolus.

The Society is entirely co-operative—every dollar of its receipts being shared with its members, and returned to them in the way of information gathered in its researches, all of which is published in the magazine, and in many other benefits in which every member participates.

We know a membership in this Society will be of great benefit to both you and us, and thus, to further our mutual interests in Gladiolus, we are offering a membership in the form of a discount on all cash orders over the sum of \$20.00.

If you are not already a member, take advantage of this opportunity to become one. If you are one, make some friend happy by using this discount offer in presenting your friend a membership which will be enjoyable and profitable.

Membership in the Society is \$2.00 per year, including the magazine, and is well worth more than this amount to any one.
